Allowable Subject Matter

1. Claims 1-41 are allowed over prior.
2. The following is a statement of reasons for allowance: As indicated in the previous office action claims 2-25 and 27-41 contain allowable subject matter. Applicant has amended claims 1 and 26, which corrects the previously indicated 112, second paragraph rejection. Although the cited prior art, Fukumasa et al, Leem, teach spread spectrum mobile system that allocates codes after code processing which consist of combining codes to produce additional codes, they fail to teach/suggest M (sets of combined codes) as being defined as $(\text{INT}(N/S)+1)$, where N is the total number of codes used for used by all mobile stations connected with a base station and S is the total number of orthogonal codes, multiple ("k") spread adder units and an adder for adding spread spectrum signals from multiple ("k") adder units, code allocation is executed when a set of transmission signals from the base station is changed, and generating another set of combined codes by multiplying first codes by another different code selected from a second set of second codes after third set of combined codes has been used to transmit approved spectrum signals.
